Star Ingredients

Our excitement about the unrivalled benefits of the rarest botanicals on the planet, sustainably sourced in the remote, green, nuclear-free antipodean islands inspired us to create a range of bespoke skincare products abundant with high levels of most vigorous, multitasking actives in the world.

BioRestore3Plus

is our proprietary, flagship ingredient that creates a huge advantage in the efficacy and distinctiveness of our brand. BioRestore3Plus is a blend of the world's most effective, all natural, multitasking botanicals, renowned for their remarkable antioxidant and moisture-retaining properties. This top performing trio of native red and green seaweeds (*Codium fragile subsp.novae-zelandiae* and *Aeodes nitidissima* and Mamaku - New Zealand Black fern gel), is abundant with naturally occurring polysaccharides and peptides, that help to enhance skin's barrier function, protect against water loss and act as a powerful antioxidant.

Bio-Active Manuka Honey

Due to its anti-inflammatory properties, our bio-active Manuka honey 24+ promotes skin overall wellbeing, regeneration, reduces redness and soothes congested or inflamed skin. Incorporated in Te Mana skincare range, bio-active Manuka honey 24+ also helps to retain moisture and inhibits MMP, a group of collagen destroying enzymes.

New Zealand Merino Wool Proteins

Pro-Collagen Boosters

New Zealand Merino Wool proteins are almost identical to the proteins present in the skin. Therefore, they have this amazing ability to naturally interact with skin structure. Keratin intermediate filament proteins present the most abundant

material in the outer layers of the skin, while being the core structure of all cells at the same time. When applied to the skin these proteins boost natural regeneration of skin's essential collagens, in order to create stronger and vibrant dermal-epidermal network.

Zealong – 100% New Zealand Grown Tea

Zealong is premium green tea grown at the Zealand Tea Estate in the pristine air and soils of Waikato, New Zealand. It is processed to the highest of quality standards and crafted by the world's best tea masters. Zealong is Aotearoa's gift, rich in antioxidants, essential vitamins and minerals such as calcium, manganese,

copper, selenium, and potassium, as well as vitamin A, vitamin B, vitamin C, vitamin E and vitamin K. Green tea helps improve your skin complexion and its overall health. It improves the skin's elasticity, helps flush out toxins, helps remove blemishes and scars, and reduces inflammation.

Enzogenol® – New Zealand Pine Bark Extract

Enzogenol® is a 100% natural extract from the bark of New Zealand grown Pinus Radiata trees. Enzogenol® consists of a potent mixture of natural antioxidant and anti-inflammatory plant compounds known as bioflavonoids. It is scientifically proven to boost the skin's natural free radical defence, stimulates skin cell growth, binds and protects collagen.
